

Lateral Data Release Notes

Product: Viewpoint

Version: 5.4.1

Release Date: November 11, 2012

Processing	Issue resolved with garbled text being created for specific Japanese file encodings.
Import	Able to post new custom fields when Review database already contains custom fields created during import.
Review	When opening a View using the Lookup by Doc ID feature, the specific page that Doc ID is located on will display in the Documents panel.
View Manager	Build View speed dramatically increased when using only the Duplicated Files exclusion option.
View Manager	Issue resolved with inaccurate results being returned from metadata searches containing certain foreign character encodings.
Assisted Review	Seed View size optimized for improved predictability. This change may result in larger Seed Views than expected.
Email Thread Analyzer	Orange subject line changes now visible for unique emails highlighted in green.
