

Viewpoint 6.4 Release Notes

Release Date: 11/30/2018

What's New in Viewpoint 6.4?

Note: Full release notes are not intended for end user distribution. Items in **bold** are recommended to be communicated to end users.

Significant

Added functionality to sort automation criteria by custom fields

Added revamped delivery interface in the web UI

Added new "Rapid Search" feature in the web UI. This requires the Full Text Search feature to be added to the Review SQL Server for the installation/upgrade to complete successfully.

Review/Project Management Automation - Project Pipes

Added image analytics to filter out images not requiring OCR

Added ability to assign workers to users

Added scripts to process and post dedupe sets in processing automation

Improved notes/native content detection for PowerPoint files

Support Office 2016 32 bit on worker hosts

Added feature to copy/paste all redaction coordinates on a page

New check when redacting to look for existing redactions on hashcode matching documents and provide functionality for user to auto copy those redactions

New options to save redacted image as PDF

Greatly enhanced file name flexibility when saving and printing documents from review

Viewpoint 6.4 Release Notes

Release Date: 11/30/2018
