## 1. Worker Licensing

As of version 7.4.1 Viewpoint workers will need to have a Viewpoint license. Licensing a Worker is very similar to licensing Viewpoint Processing (PMC). You should use the same license file for Processing and Worker.

Follow the below procedure (copied from section 1.1.1 of the **Viewpoint License Guideline** document) to install the Worker license:

4. *Locate the IIS virtual folder which hosts your click-once deployment package for the viewpoint Worker application.*
5. *Place a copy of the Processing license file (license.xml) into the root Worker folder.*
6. *Launch the Worker application (install it). You will be prompted to enter the name of the Server. If the license file has been installed correctly the Worker will continue to start as normal. Otherwise you will receive a license-specific error message.*

## 2. OmniPage OCR Licensing

Starting in Viewpoint 7.4.1 you will need to have specific licensing to use OmniPage OCR features through Viewpoint. OmniPage OCR will be permitted only on machines (Worker or PMC) which are listed in the Viewpoint License.
