

7.5.3 Release Notes

The following is a highlight of the new improvements available in the latest version of the Viewpoint eDiscovery software platform.

Classic Review

- When 'Use WebView2 as Document Viewer' is set to ON, users can now use the Ctrl+F and Ctrl+A options in the HTML Viewer

View Manager

- Contains, Does Not Contain, Begins With and Ends With operators now function properly when using the Multi Value feature
- Users no longer receive an error when selecting over 2,100 views
- Progress bar no longer continuously displays when rebuilding multiple views on the workers

Web Review

- Production Tag filter available in the Documents panel no longer includes Stand Alone tags

Web Search

- Resolved an issue in Rapid Search when a Multiple Field search condition included the text string "and" as part of the search criteria

Delivery

- Load files are now named properly when doing a redelivery or regenerating cross-reference files
