

## Viewpoint 7.7.1 Release Notes

| Category            | Application | Work Item Type | Title                                                                                                                                                   |
|---------------------|-------------|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| Assisted Redactions | Classic     | Resolved       | Assisted Redaction jobs showing as complete, when not actually complete                                                                                 |
| Assisted Redactions | Classic     | Resolved       | Screen did not refresh after successfully applying a regular expression native redaction                                                                |
| Dashboard           | Web         | Resolved       | In the Project Details panel, sometimes clicking on any of the links in Recent Activities tab nothing happens even if the project has access            |
| Dashboard           | Web         | Update         | Move Build ETA button from Project toolbar to Pivot toolbar                                                                                             |
| General             | Both        | Update         | Verify that Viewpoint can run on Windows 11                                                                                                             |
| General             | Web         | Resolved       | User no longer sent to error page after a failed login followed by a successful login                                                                   |
| Import              | Classic     | Resolved       | When an import template is altered and the user attempts to select a different template in the dropdown, user should be prompted to save/cancel changes |
| Import              | Classic     | Update         | Removed 'MaxDocumentsInProgressGrid' setting as it is no longer relevant in 64-bit                                                                      |
| Import              | Classic     | Update         | Increase allowed range for "Maximum size of image files to import(in megabytes)" from 100MB to 10GB                                                     |
| Processing          | Classic     | Resolved       | Unable to catalogue emails extracted from Office365 Connector                                                                                           |
| Processing          | Classic     | Resolved       | App crash when extracting metadata from certain GUL and JTD file types                                                                                  |
| Processing          | Classic     | Resolved       | Posting a dedupe set with full integrity checked resulted in SQL error                                                                                  |
| Processing          | Classic     | Resolved       | Tiffing using TIFF parameters caused Processing to crash                                                                                                |
| Processing          | Classic     | Resolved       | Fixed error cataloging Skype files                                                                                                                      |
| Review              | Classic     | Resolved       | Fixed integer sorting in the filter grid                                                                                                                |
| Review              | Classic     | Resolved       | Viewing certain email in HTML viewer with WebView2 turned off, no longer cuts off the signature section of the email                                    |
| Review              | Web         | Resolved       | Not displaying correct message in TIFF viewer when there is no TIFF for the document                                                                    |
| Security            | Web         | Resolved       | Not displaying Roles Page for Access Role Permission                                                                                                    |
| Translations        | Classic     | Resolved       | When asked to overwrite existing translation, selecting "No" still overwrote the existing translation                                                   |
