***Summary Dates are internal metadata properties.**

1. PDF Examples: (Accessed via File Menu, Document Properties)
 - a. Summary Created Date – Date that the source file was converted to a PDF.
 - b. Summary Modified Date – Date that the contents of the PDF were modified within Adobe Acrobat. (If no modifications, Modified Date = Created Date)
2. MS Office Examples: (Accessed via File Menu, View Document Properties, Statistics Tab)
 - a. Summary Created Date – Date that the contents of the file were first saved within MS Office.
 - b. Summary Modified Date – Date that the contents of the file were modified and subsequently saved within MS Office. (If no modifications, Modified Date = Created Date)

****File System Dates are stored within the OS environment.**

1. File System Created Date – Date that the file is created on a media. This does not change when working normally with the file. (Ex. opening/closing/saving/modifying)
2. File System Modified Date – Date shown by the OS when there has been a change to the file itself. For example, this modified date would be shown in Windows Explorer, whereas the Summary Modified Date is seen only within the file properties within the native application.
